

IS YOUR LAWN CRISPY?

# *Sprinkler Systems*

We get it...it's hot out there. Your lawn is brown, your dog is thirsty, and your kids are laying around inside instead of playing outside. You need spinklers, fast.

---

*Guess what; there's a code for that...*

To paraphrase the Code: "A backflow preventer will be required on all sprinkler systems for domestic water".

Basically, you will need a plumbing permit for the backflow preventer.

Good news! You can download a plumbing application by clicking **HERE** or visit our website at [www.klamathcounty.org](http://www.klamathcounty.org) for more information
