LUCS or City approval required) Fees Apply Residential = Up to a 2 week timeframe Commercial = Time varies
RESIDENTIAL PERMIT PROCESS

1. Verify zoning and determine if a dwelling is permitted on the property.

2. Provide proof of legal access to the property.
   - If your property does not front a public road, provide a copy of all recorded easements to a public right-of-way.

3. Obtain a Land Use Compatibility Statement (LUCS) from the Planning Dept. for a septic evaluation.
   - Submit a site plan of the property, indicating where the proposed test holes will be located and where the home is intended to be placed.
   - The fee is $29

4. Obtain a septic evaluation approval from the Klamath County On-Site Dept.
   - Contact the On-Site Dept. for requirements and fee.

5. Obtain a LUCS from the Planning Dept. for a septic installation.
   - Submit a site plan of the property, indicating the proposed location of the septic tank and initial and replacement drain fields will be located and where the home is intended to be placed.
   - The fee is $29

6. Obtain a LUCS from the Planning Dept. for a home site approval.
   - Submit a site plan showing where the home will be located on the property including distance to property lines.
   - The fee is $87

7. Obtain a sign-off on the LUCS from the On-Site Dept. that indicates that the home will not be located on the septic tank or drain field.

8. Obtain required building permits from the Building Dept.

9. A building permit for a “dwelling,” has to be issued and remain active in order to have any accessory structures.

* A dwelling is either a stick-built or manufactured home.
Site Plan Requirements
Reviewed per KCLDC Article 41

The following information must be shown on every Site Plan:

1. Map and tax lot number and street address if known;
2. Dimensions of property and north arrow;
3. Location of existing or proposed driveways;
4. Locations and use of all existing structures on the property;
5. Locations, dimensions (including height) of all proposed structures including decks, balconies, and other structural elements;
6. Distance from property lines to all existing and proposed structures, septic tanks, drain lines and wells;
7. Existing or proposed on-site sewage disposal and water supply;
8. Location and dimensions of all easements;

Please Note:

- All Site Plans must be neat and legible, use a straight edge (ruler) whenever possible;
- All Site Plans must be "self-explanatory"; a person should be able to understand the proposed development based on the information provided on the site plan;
- The maximum page size accepted is 11" x 17".

Site Plans not meeting the above standards may be deemed incomplete.

* 50-Feet Setback for Wells constructed with special standards granted by WRD.

*** This does not prevent stream crossings of pressure effluent sewers.
The following information must be shown on every site plan:

1. Map and tax lot number and street address if known (see note below on obtaining address);
2. Dimensions of property and north arrow;
3. Location, name, width and surface type of adjacent streets;
4. Location, dimensions and surface of existing or proposed driveways or parking areas;
5. Locations, dimensions (including height), and use or occupancy of all existing and proposed structures on the property, including accessory structures, decks, balconies, and other structural elements;
6. Distance from property lines to all existing and proposed structures, septic tanks, drain lines and wells;
7. 100 year flood plain, location of water and drainage features and the flow direction of any ponds, channels, creeks, swales or other drainage facilities affecting the proposed use or adjacent properties;
8. Location, type, and dimensions of proposed on-site sewage disposal and water supply, if any;
9. Locations and descriptions of any topographic or developed feature on the site, such as rock outcrops, excavations, etc.;
10. Location and dimensions of all easements;
11. Other appropriate information that otherwise may be required by the Code;
12. Signature of applicant and date site plan prepared.

If development is for commercial, industrial and/or multi-family (triplex and above), also include the following:

- Landscaping as required by Article 65;
- Signs as required by Article 66;
- Parking as required by Article 68;
- Vehicular access and circulation as required by Article 71;

Note: Public Works requires the following prior to address issuance: Copy of approved site plan and LUCS from Planning initialed in the Klamath County Plot Plan Approval Stamp box by Planning and On-Site (if Onsite system) Submit the above to Public Works to apply for address and driveway permit.
ATTENTION: Applicants Submitting SITE PLANS

All Site Plans must comply with the following:

1. All applicable criteria as described on the Residential Site Plan Application Packet.

2. The setback of a structure must reflect the distance from the property line to the outermost architectural feature (such as eaves) of the building or structure.

3. Site Plans must be drawn as neatly as possible
   - Use a straight edge (such as a ruler) whenever possible
   - All text must be legible

4. Site Plan must be “Self Explanatory”, Someone should be able to understand the site plan without having to ask the applicant questions.

5. If on a septic system please include the following information:
   - Location of test holes (if applicable)
   - Length of line from the dwelling to the tank
   - Length of line from tank to drainfield
   - Length of the drain lines
   - Length of the drain lines for replacement area
   - Distance from tank to well (if applicable)
   - Distance from drain lines to well (if applicable)
   - Distance to neighboring wells

Note: All easements may not be shown on the Assessor maps.

SITE PLANS NOT CONFORMING TO THE ABOVE STANDARDS MAY BE REJECTED!
